Please provide reasons for requesting revisions to the methodology. If the request for revision is related to a project under development or implementation, please describe the context in which they arose:	<p>(1) Revision is proposed to clarify the requirement for the plan of not releasing the refrigerant. Hence additional description is proposed by referencing the description of Criterion 4 in "JCM_ID_AM004_ver01.0".</p> <p>(2) The methodology is applied to a JCM project under implementation, which utilizes advanced automated monitoring system to monitor and record power consumption of fridge-freezer showcase. Since the initial approved methodology solely indicates a manual monitoring method, an automated monitoring alternative is proposed to enable the methodology to be applicable to projects which utilizes such advanced monitoring technologies.</p> <p>(3) The revision is proposed to incorporate common business practice and requirement.</p>
