LETTER OF CONSENT

We, PT. Primatexco Indonesia, hereby give our consent on plan for not releasing refrigerant used for the project and existing chillers, in order to contribute to mitigating GHG emissions under the *Joint Crediting Mechanism (JCM)*. We also consent to the followings;

- 1) In order to avoid atmospheric release, a refrigerant (HFC245fa) in the project chiller is handled safely in accordance with Indonesian Law on Environmental Protection and Management (Law No. 32/ 2009, dated October 3, 2009) when the project chiller (Ebara high efficiency centrifugal chiller, RTBF050) is scrapped or disposed.
- 2) A refrigerant in existing chiller (absorption type) is water, so the special handling is not required.
- 3) A refrigerant is extracted/treated in the proper manner following the instruction by PT. Ebara Indonesia when the project chiller is maintained.
- 4) In case of refrigerant disposal in the project chiller, PT. Primatexco will outsource its destruction with well-equipped plant, such as Prasadha Pamunah Limbah Industri (PPLi) [address : Jl. Raya Narogong, Desa Nambo Kec. Klapanunggal Bogor 16820].

Yours faithfully.
