Category	No.	Term	Definition in JCM
Emission reductions or removals	1.	Greenhouse Gases (GHG)	GHG are those gases of carbon dioxide (CO_2) , methane (CH_4) , nitrous oxide (N_2O) , hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF ₆) and nitrogen trifluoride (NF ₃) (RoI para.2).
	2.	JCM project	GHG emission reductions or removals project activities under the JCM (RoI para.3).
	3.	Eligible project type list	List of titles of methodologies approved by the Joint Committee under the JCM with their eligibility criteria.
	4.	Eligibility criteria	Eligibility criteria are requirements for the JCM project defined in the JCM methodology and contain the followings: (a) Requirements for the project in order to be registered as a JCM project; (b) Requirements for the project to be able to apply the JCM methodology.
	5.	Net decrease and/or avoidance of GHG emissions	In the JCM, emission reductions to be credited are defined as the difference between reference emissions and project emissions. The reference emissions are calculated below business as usual (BaU) emissions to ensure a net decrease and/or avoidance of GHG emissions.
	6.	Reference emissions	Reference emissions are calculated below business-as-usual (BaU) emissions. Reference emissions are calculated by multiplying a crediting threshold which is typically expressed as GHG emissions per unit of output by total outputs.
	7.	Business-as-usual (BaU) emissions	Business-as-usual (BaU) emissions represent plausible emissions in providing the same outputs or service level of the proposed JCM project in the host country.
	8.	Crediting threshold	Crediting threshold is typically expressed as GHG emissions per unit of output. A crediting threshold is established <i>ex ante</i> in the methodology applicable for the same project type in the host country. It should also be established conservatively in order to calculate reference emissions below BaU emissions.
	9.	Emissions sources and GHG types	Those emissions sources and GHG types whose emissions are significant and reasonably attributable to the JCM project.
	10.	Sinks and GHG types	Those sinks and GHG types whose removals or emissions are significant and reasonably attributable to the JCM project.

Joint Crediting Mechanism Glossary of Terms

Category	No.		Definition in JCM
	11.	Sectoral scope	The category of GHG source sectors or groups of activities that apply to JCM projects. It is based on the sectoral scope for the CDM. A JCM project may fall within more than one sectoral scope.
	12.	Level of assurance	Level of assurance is defined as degree of assurance the Joint Committee requires in a verification. The level of assurance is used to determine the depth of detail that a verifier designs into their verification plan to determine if there are any material errors, omissions or misrepresentations.
	13.	Materiality	Materiality is a concept that individual or the aggregation of errors, omissions and misrepresentations could affect the greenhouse gas assertion and could influence the intended users' decisions.
Governance	14.	Each Government (side)	Each side, based on the rules and guidelines as developed by the Joint Committee and/or in accordance with relevant domestic laws and regulations in respective countries for the implementation of the JCM: (a) Prepares draft methodologies and submits them to the Joint Committee; (b) Establishes and maintains a registry in line with the common specifications for registries, as developed by the Joint Committee; (c) On the basis of notification for issuance of credits by the Joint Committee (including for allocation of credits among participants), issues the notified amount of credits to its registry. Each side promptly informs the Joint Committee on the issuance of credits under the JCM (RoI para.13-14).
	15.	Joint committee	The both sides establish the Joint Committee which consists of the representatives from both sides. The Joint Committee may develop or modify the Rules of implementation and other rules and guidelines necessary for the implementation of the JCM. The Joint Committee designates the third-party entities. On the basis of a request for registration of JCM projects submitted by project participants, the Joint Committee registers JCM projects which were validated by the third-party entities. On the basis of a request for notification to each

Category	No.	Term	Definition in JCM
			side for issuance of credits submitted by project
			participants, the Joint Committee notifies both
			sides to issue the credits which were verified by
			the third-party entities. (RoI para.5-9).
	16.	Joint committee	The Joint Committee establishes its secretariat
		secretariat	for the implementation of the JCM (RoI para.12).
	17.	Third-party entity	A third-party entity that is designated by the Joint
			Committee:
			(a) On the basis of requests from project participants, validates the project as described in
			a PDD prepared by the project participants, in
			line with the guidelines for the validation as
			developed by the Joint Committee, and informs
			the validation result to the project participants;
			(b) On the basis of requests from project
			participants, verifies GHG emission reductions or
			removals achieved by the JCM project as
			described in the monitoring report prepared by
			the project participants, in line with the
			guidelines for the verification of GHG emission
			reductions or removals as developed by the Joint Committee, records the verification result in a
			verification report and sends the report to the
			project participants (RoI para.18).
	18.	Project	Project participants:
		participant	(a) Prepare a draft methodology and submit the
			draft to the Joint Committee for its approval;
			(b) Prepare a draft PDD and submit the draft to a
			third-party entity for validation and notify the
			Joint Committee;
			(c) Submit the PDD that was validated by the
			third-party entity to the Joint Committee for its
			registration of the project; (d) Implement the ICM project and conduct
			(d) Implement the JCM project and conduct monitoring in line with the PDD;
			(e) Prepare a monitoring report and send the
			report to a third-party entity for verification;
			(f) Submit a verification report prepared by the
			third-party entity to the Joint Committee, and
			request notification to each side for issuance of
			credits under the JCM (RoI para.19).
Documents/	19.	Methodology	A methodology applied to JCM projects for
infrastructure			calculating emission reductions achieved by each
			project and monitoring the JCM project.
			A proposed methodology is a methodology that has been submitted to the Joint Committee for
			approval. A proposed methodology consists of
			proposed methodology form and Proposed
	L		proposed memodology form and rioposed

Category	No.	Term	Definition in JCM
			Methodology Spreadsheet.
			An approved methodology is a methodology that
			has been approved by the Joint Committee for
			application to JCM projects. An approved
			methodology consists of an approved
			methodology document and a Monitoring
			Spreadsheet. Approved methodologies are
			publicly available on the JCM website.
	20.	Proposed	A Proposed Methodology Spreadsheet is a part of
		Methodology	a proposed methodology developed by
		Spreadsheet	methodology proponents.
		~ [A Proposed Methodology Spreadsheet defines a
			monitoring plan and enables calculation of GHG
			emission reductions automatically through
			inputting values. The Proposed Methodology
			Spreadsheet consists of an input sheet and
			calculation process sheet.
	21.	Monitoring	A Monitoring Spreadsheet is a part of an
		Spreadsheet	approved methodology.
		Spreadenteet	The Monitoring Spreadsheet consists of a
			Monitoring Plan Sheet (input sheet and
			calculation process sheet), Monitoring Structure
			Sheet, and Monitoring Report Sheet (input sheet
			and calculation process sheet). The Monitoring
			Plan Sheet and Monitoring Structure Sheet are
			used for developing a monitoring plan and
			calculating emission reductions ex ante. The
			Monitoring Report Sheet is used for preparing a
			monitoring report and calculating emission
			reductions ex post. The Monitoring Plan Sheet
			and Monitoring Report Sheet are prepared based
			on the Proposed Methodology Spreadsheet and
			the Monitoring Structure Sheet is added by the
			secretariat after the approval of the proposed
			methodology by the Joint Committee.
	22.	Project design	The document prepared by the project participant
		document (PDD)	of a JCM project which sets out in detail the JCM
			project which is to be realized. A Project design
			document (PDD) consists of a completed PDD
			form and monitoring plan using a Monitoring
			Plan Sheet and Monitoring Structure Sheet of the
			Monitoring Spreadsheet. The form of PDD,
			Monitoring Spreadsheet, and guidelines on
			preparing the PDD, are publicly available
			through the JCM website.
	23.	Monitoring plan	A monitoring plan sets out the methodology to be
		-	used by project participants for the monitoring of,
			and by third-party entities for verification of the
			amount of GHGs emission reductions achieved

Category	No.	Term	Definition in JCM
			by the JCM project. A monitoring plan is developed using Monitoring Plan Sheet and Monitoring Structure Sheet of Monitoring Spreadsheet.
	24.	Monitoring report	A monitoring report is prepared by a project participant and sets out the GHG emission reductions of an implemented registered JCM project for a particular monitoring period. A monitoring plan is prepared using a Monitoring Report Sheet of a Monitoring Spreadsheet.
	25.	Registry	Each side establishes a registry to record and use the credits (RoI para.34).
	26.	Credit	Credits are issued based on quantified amount of GHG emission reductions or removals achieved by the contribution of project participants in the implementation of GHG emission reductions or removals project activities under the JCM (RoI para.3).
Project cycle	27.	Modalities of communication statement (MoC)	A modalities of communication statement (MoC) from (or signed by) all project participants participating in a JCM project, defined in a prescribed form, that designates one focal point entities to communicate on their behalf with the secretariat and the Joint Committee in line with established scopes.
	28.	Validation	Validation is the process of independent evaluation of a proposed JCM project by a third-party entity against the validation guidelines as developed by the Joint Committee on the basis of the PDD (RoI para.24).
	29.	Registration	Registration is the formal acceptance by the Joint Committee of a validated project as a JCM project (RoI para.27).
	30.	Monitoring	Project participants implement a JCM project and monitor GHG emission reductions or removals by the JCM project based on the PDD (RoI para.30).
	31.	Verification	Verification is the periodic independent review and ex post determination by a third-party entity of the monitored GHG emissions reductions or removals as a result of a registered JCM project during the verification period (RoI para.31).
	32.	Issuance of credits	The action taken by each side to issue the credits to its respective account in the registry in line with the notification of the Joint Committee.
