Sent: Tuesday, September 20, 2016 8:20 PM
To: mn-pm-pi@jcm.go.jp
Subject: Inputs to methodology MN_PM003

Methodology No.: MN_PM003
Version: Ver1.0
Title: Installation of Solar PV System
Comment:

In general the emission factors are very conservative, which ensures that the emission reductions calculated using this methodology are real. Nevertheless, it could be appropriate to establish a period to review the emissions factors showed in the document, maybe the values could be reviewed/updated every 5 or 10 years.
