Table3: Ex-ante estimation of CO₂ emission reductions

CO ₂ emission reductions	Units
0	tCO ₂ /y

[Monitoring option]

-	Option A	Based on public data which is measured by entities other than the project participants (Data used: publicly recognized data such as statistical data and specifications)
	Option B	Based on the amount of transaction which is measured directly using measuring equipments (Data used: commercial evidence such as invoices)
	Option C	Based on the actual measurement using measuring equipments (Data used: measured values)
