1. Objectives

 The Joint Crediting Mechanism (hereinafter referred to as "JCM") aims to contribute to the sustainable development in the Republic of Indonesia through the implementation of JCM projects, and the "Joint Crediting Mechanism Guidelines for Developing Sustainable Development Implementation Plan and Report" (hereinafter referred to as "these Guidelines") facilitates this objective.

2. Scope and applicability

- 2. These Guidelines are applicable to project participants, the Joint Committee and the secretariat with respect to evaluation of the contribution of JCM projects to the sustainable development in the Republic of Indonesia.
- 3. These guidelines are intended to assist project participants in developing JCM sustainable development implementation plan (hereinafter referred to as "SDIP") and sustainable development implementation report (hereinafter referred to as "SDIR").
- 4. These Guidelines describe standards which are requirements to be met, except guidance indicated with terms "should" and "may" as defined in paragraph 7 below.

3. Terms and definitions

- 5. "SDIP" is prepared by the project participant of a JCM project by filling in "JCM Sustainable Development Implementation Plan Form" (hereinafter referred to as "SDIP form") and sets out in detail, in line with the JCM rules and guidelines, a plan of the JCM project to contribute to sustainable development.
- 6. "SDIR" is prepared by the project participant of a JCM project by filling in "JCM Sustainable Development Implementation Report Form" (hereinafter referred to as "SDIR form") and sets out the result of SDIP implementation for a particular monitoring period.
- 7. The following terms apply in these Guidelines:
 - (a) "Should" is used to indicate that among several possibilities, one course of action is recommended as particularly suitable;
 - (b) "May" is used to indicate what is permitted.
- 8. Terms in these Guidelines are defined in "JCM Glossary of Terms" available on the JCM website.

4. General guidelines

- 9. When designing a proposed JCM project and developing an SDIP and an SDIR, project participants apply these Guidelines.
- 10. The project participants provide a comprehensive description of plan for contributions to sustainable development (hereinafter referred to as "SD") through the proposed JCM project.
- 11. The project participants should conduct ex-ante analysis of the contribution to SD using the SDIP form and ex-post evaluation of the contribution to SD using the SDIR form.
- 12. These Guidelines, the SDIP form and the SDIR form can be obtained electronically from the JCM website.

- 13. The Joint Committee may revise the SDIP form and the SDIR form, if necessary.
- 14. The SDIP form and the SDIR form are completed in English language.
- 15. The presentation of values in the SDIP form or SDIR form, including those used for the calculation, where necessary, should be in international standard format e.g. 1,000 representing one thousand and 1.0 representing one. The units used should be accompanied by their equivalent S.I. units/norms (thousand/million) as part of the requirement to ensure transparency and clarity.
- 16. The SDIP form and the SDIR form are to be completed without its format, font and headings being altered.
- 17. Project participants are encouraged to refer to, as appropriate, the related local and/or national regulations and guidelines in their preparation of SDIP and SDIR.

5. Developing an SDIP and an SDIR

In the following section, a hypothetical project is described in red color as an example to show how to fill in the SDIP form and SDIR form.

5.1. Completing an SDIP form

< Example of a completed SDIP form>

A. Project description

A.1. Title of the JCM project

Energy Management System application for office buildings in the Republic of Indonesia

A.2. Contact information

Name of the focal point entity (ies):	Asia Pacific Buildings Holding Company Limited (Building 1, 2, 3)
Name of authorized signatory	
Last name:	First name:
Title:	

Please name the focal point entity of the proposed project.

B. Possible Contribution to Sustainable Development

B.1 Plan for possible contribution to SD

. i Pian	for possible col	ntribution to SD		
No.	Items	Questions	Yes/No	If the selected answer is "Yes" in the left-hand column, please describe the action plans in a blank cell in this column.
1	EIA	Does the proposed project require official/legal process of EIA?	No⊠ Yes□	
2		Does the proposed project emit air pollutants?	No⊠	
			Yes	
3		Does the proposed project discharge water pollutants or substances which influence BOD, COD or pH, etc.?	No 🔀	
,			Yes□	
	Pollution Control	Does the proposed project generate waste?	No	
4	(No answer is necessary if EIA is		Yes⊠	A small amount of waste is expected during the set up of equipment. However, generated waste will be treated in line with the company recycling plan for proper disposal.
_	required)	Does the proposed project increase noise, vibration and/or odor beyond the levels required	No	
5		by laws or regulations?	Yes⊠	Certain noise increase is expected. However, proper noise control measure will be carried out.
6		Does the proposed project cause ground	No⊠	
0		subsidence?	Yes	
	Cofeta and	Does the proposed project create dangerous condition for local communities as well as	No	
7	7 Safety and Health	individuals involved in the project, during either its construction or its operation?	Yes⊠	The project may create a dangerous condition during its installation. However, preventative measures will be carried out for securing safety of workers during its installation.
0		Is the proposed project site located in protected	No	
8		areas designated by national laws or international treaties and conventions?	Yes	
9	Natural Environment and Biodiversity	Natural Environment and Does the proposed project change land use of the community and protected habitats for endangered species designated by national laws or international treaties and conventions?	No⊠	
9			Yes	
10		Does the proposed project introduce foreign species?	No⊠ Yes□	
11		Does the proposed project include construction	No 🔀	
1.1				

		activities considered to affect natural	Yes	
			168	
		environment and biodiversity (e.g., noise,		
		vibrations, turbid water, dust, exhaust gases, and		
		wastes)?		
12		Does the proposed project use surface water,	No⊠	
12		ground water and/or deep ground water?	Yes _	
1.2		Does the proposed project have negative impact	No🛚	
13		on local workforce capacity?	Yes	
	Economy	Does the proposed project have negative impact	No	
14		on local community's welfare?	Yes	
		Please describe what best possible measures the	-	
		project participants of the proposed project take		
		to ensure human rights through the supply chain		
15		and the implementation of the proposed project,		
		and demonstrate that there is no violation of		
		human rights.		
		Please describe, if possible, how the project		
		participants of the proposed project respect,	_	
		promote and consider their respective right to		
1.0		health, the rights of indigenous peoples, local		
16		communities, migrants, children, persons with		
	Social and	disabilities and people in vulnerable situations		
	Local	and the right to development, as well as gender		
	Community	equality, empowerment of women and		
	Participation	intergenerational equity.		
17	rarticipation	Does the proposed project cause any	No	
17	_	resettlement or other types of conflict?	Yes	
		Does the proposed project include activities to	No⊠	
		respond to, and follow up, comments and		
18		complaints that have been received from local	Vas	
		communities, particularly from the public	Yes□	
		consultation?		
	1	Do the project participants comply any laws	No	
		and/or ordinances associated with the working	_	
19		conditions of local communities which the		
		project participants should observe in the	Yes□	
		project?		
L	L	P-~J+++		1

20		Does the proposed project include activities to build capacity of human resources through	No	
20		technology transfer and technical assistance?	Yes□	
	T 1 1	Does the proposed project describe information	No⊠	
21	Technology	of technology specification that consists of manual book and ways to overcome the		
21		problems that may occur when being operated	Yes	
		on the site, at least in English and in Bahasa		
		Indonesia as applicable?		

Where applicable, please identify the impact of a proposed project on its surroundings using the guiding questions. If the selected answer is "Yes", describe in a blank cell in the rightmost column above a plan for contribution to sustainable development while ensuring compliance with national and local regulations. Please answer each question and select Yes or No (including "Not sure at the stage of submitting SDIP") depending on the situation at the stage of submitting SDIP.

5.2. Completing an SDIR form <Example of a completed SDIR form>

A. Project description

A.1. Title of the JCM project

Energy Management System application for office buildings in the Republic of Indonesia

A.2. General information of project

Reference Number	ID00X
Registration date	dd/mm/yyyy
Monitoring period	Start: dd/mm/yyyy, End: dd/mm/yyyy

B. Contribution to Sustainable Development B.1 Check list for contribution to SD

B.1 Che	eck list for contributi	on to SD			
No.		Items	Not	Identified	If "Identified" is checked in the box, please describe the
			identified		corrective actions
1	EIA	Project is included in the EIA reporting to the	\boxtimes		
1	EIA	Government of Indonesia			
2		Occurrence of pollution in ambient air quality	\boxtimes		
3		Occurrence of pollution in water quality			
4	Pollution Control	Occurrence of waste generation	\boxtimes		
5	Pollution Control	Occurrence of noise and/or vibration	\boxtimes		
6		Occurrence of ground subsidence	\boxtimes		
7		Occurrence of ambient odor	\boxtimes		
		Occurrence of accident or occupational accident		\boxtimes	An accident occurred. But its damage was compensated
8	Safety and Health				and the safety measures were revised for local communities
	•				as well as individuals involved in the project.
9		Change of protected area condition	\boxtimes		
10	37 . 1	Change of land use change and ecosystem condition	\boxtimes		
11	Natural	Introduction of foreign species	\boxtimes		
12	Environment and Biodiversity	Environmental impact during construction	\boxtimes		
13	Diodiversity	Use of surface water, ground water and/or deep ground	\boxtimes		
13		water			
14	Economy	Decrease in local workforce capacity			
15	Economy	Declination of local community welfare			
16		Violation of human rights through the supply chain and	\boxtimes		
10		implementation of the project			
		Problems related to the right to health, the rights of	\boxtimes		
		indigenous peoples, local communities, migrants,			
17	Social and Local Community Participation	children, persons with disabilities and people in			
1 /		vulnerable situations and the right to development, as			
		well as gender equality, empowerment of women and			
		intergenerational equity			
18		Occurrence of resettlement or conflict			
19		Failure to follow up comments and complaints			
		successfully			
20		Violation of regulatory working condition	\boxtimes		

21		Failure to build human and institutional capacity by technology transfer						
22	Technology	Failure to provide technology specification and manual book at least in English and in Bahasa Indonesia as applicable						
	Please check each box, either in "Not Identified" or "Identified" depending on the kind of impact through the implementation of the project in line with each identified item. Where "Identified" box is checked, project participants are requested to describe the corrective actions on each "Identified" impact.							
B.2 Ple	ase describe the contr	ribution of the JCM project to the sustainable develo	opment in the	he Republic o	of Indonesia below:
