#### JCM Sustainable Development and Safeguards Assessment Report

Project description	
Title	Introduction of Solar PV Systems on Rooftops of Factory
	and Office Building
Project participant (Thai)	Siam Steel International Public Company Limited
Project participant (Japanese)	Pacific Consultants Co., Ltd.
Project location	51 Moo 2, Poochao Rd., Bangyaprak, Phrapradaeng, Samutprakarn, Kingdom of Thailand
Latitude, longitude	Site A: N 13° 38' 47" and E 100° 32' 55" Site B: N 13° 39' 01" and E 100° 33' 01"
Project status	Operated since 20/06/2016

Report description								
Date of report completion	12 May 2025							
Version	1.0							
Corresponding author	Name Yoshihiro Mizuno							
1 &	Title	General Manager of Sustainability						
	Promotion Department							
	Organization	Pacific Consultants Co., Ltd.						
	Telephone	Telephone						
	E-mail							

#### Note:

- Related figures, documents, evidence related to the description may be attached as attachment.
- In the case where there is any other relevant issue that needs to be considered, it is be specified in the last row of each area of assessment.

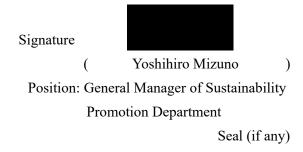

#### **Certification letter**

12/05/2025

I, the undersigned, hereby certify that Pacific Consultants Co., Ltd. is the author of the "Sustainable Development and Safeguards Assessment Report" of the project titled "Introduction of Solar PV Systems on Rooftops of Factory and Office Building" developed by Pacific Consultants Co., Ltd. and Siam Steel International Public Company Limited located at 51 Moo 2, Poochao Rd., Bangyaprak, Phrapradaeng, Samutprakarn, Kingdom of Thailand.

The report was prepared by the team members as follows:

No.	Name	Signature
1	Yoshihiro Mizuno	of
		notion
2	Daiki Nose	of
		pment
3	Shigezane Kidoura	

### Part 1: General information of the project area before project implementation

Provide baseline information describing the conditions before project implementation. This data is essential for assessing the project's environmental, social, and economic impacts. Ensure the details are accurate and comprehensive to support a thorough evaluation.

	Area of Assessment	Description						
1. E	nvironment and natural resour	rces						
1.1	Air pollution	The project is located inside the Siam Steel International site in Phrapradaeng, Samutprakarn. There is no significant air pollution in this area.						
1.2	Water pollution	No surface water and ground water pollution problem were found in the area.						
1.3	Soil pollution	No soil pollution was found in the area.						
1.4	Noise pollution	No point sources of noise pollution were found in the area.						
1.5	Odor pollution	No odor was found in the area.						
1.6	Water consumption	Industrial water was consumed within the capacity of water supply in the area.						
1.7	Solid waste/municipal solid waste	Waste from the project site is properly collected. So, there is no leftover problem in the area.						
1.8	Hazardous waste/infectious waste/electronic waste	No pollution from hazardous waste/infectious waste /electronic waste was found in the area.						
1.9	Energy (i.e. Wasted Energy, Renewable Energy)	The factory used electricity from power grid.						
1.10	Land Use	The project is located inside the Siam Steel International site.						
1.11	Biodiversity	Biodiversity was not relevant in the Siam Steel International site.						
1.12	Wild animal/ Aquatic ecosystem	No wild animal or aquatic ecosystem was found in the area.						
1.13	Other (Please specify)	-						
2. S	ociety							
2.1	Socio-cultural characteristics	Socio cultural characteristics were those of a typical Bangkok suburb. The society comprises largely of the working class who engage in manufacturing and office work.						

	Area of Assessment	Description
2.2	Health and safety	There was no major concern in terms of health and
		safety in the area.
2.3	Traditions, cultures and/or	The tradition and cultural values of the people in the
	valuable places worthy of	area are commonly found in the central region of
	conservation	Thailand. There were no distinctive places of high
		conservation values.
2.4	Race, religion, and ethnic	Most of the population in the area were of Thai origin
	group	who practice Buddhism.
2.5	Transportation	The primary mode of transportation in the area was
		private and corporate vehicles.
2.6	Other (Please specify)	-
3. I	Economic	
3.1	Overall local economy (i.e.	The local economy in the area is largely driven by the
	income, expenditure, etc.)	manufacturing sector.
3.2	Employment/Career	Factory workers, clerical workers.
3.3	Major agricultural activity in	No agricultural activity in the area is found.
	the area	
3.4	Major industry in the area	Metal product manufacturing, auto parts
		manufacturing.
3.5	Major service sector in the area	Metal processing services, office furniture sales and
		services.
3.6	Basic infrastructure (i.e. road,	The basic infrastructure in the area included
	school, etc.)	transportation (road network), utilities (electricity,
		water supply, waste management), as well as
		telecommunications.
3.7	Other (Please specify)	-

<sup>\*</sup>Project Participant explains in detail of provenance and importance of issue consider about <u>before</u> project implement and specify if the project is rightful/environmental law, social, and economy. To have Negative impact assessment (Do-no-net-harm) with supporting documents.

# Part 2 Sustainable Development Goals

## 2.1 Sustainable Development Contributions Assessment

Please mark  $\checkmark$  in  $\square$  to identify the contributions of the proposed project to specific SDG. The project is required to contribute to **at least two SDGs**, in addition to SDG13: Climate Action.

Project Contributions to		Indicator	Description of Indicator
	SDGs	(Please specify)	
	SDG 1: No Poverty		
	SDG 2: Zero Hunger		
	SDG 3: Good Health and		
	Well-being		
	SDG 4: Quality		
	Education		
	SDG 5: Gender Equality		
	SDG 6: Clean Water and		
	Sanitation		
<b>√</b>	SDG 7: Affordable and	Amount of generated clean	Increase share of renewable
	Clean Energy	energy (Unit: MWh)	energy in national energy mix
	SDG 8: Decent Work		
	and Economic Growth		
	SDG 9: Industry,		
	Innovation and		
	Infrastructure		
	SDG 10: Reduced		
	Inequality		
	SDG 11: Sustainable		
	Cities and Communities		
	SDG 12: Responsible		
	Consumption and		
	Production		
	SDG 13: Climate Action		
	SDG 14: Life Below		
	Water		
	SDG 15: Life on Land		

P	roject Contributions to	Indicator	Description of Indicator	
	SDGs	(Please specify)		
	SDG 16: Peace and			
	Justice Strong			
	Institutions			
<b>V</b>	SDG 17: Partnerships to	Last progress report	Operational continuity of the	
	achieve the Goal	submission date	JCM project, which mobilizes	
			additional financial resources,	
			disseminates low-carbon	
			technologies, and reduces GHG	
			emissions in Thailand	

<sup>\*</sup>Project Participant provides the description for each indicator of the selected SDGs and presents currently available datasets along with supporting documents.

### 2.2 Details on Monitoring Parameters for Demonstrating SDG Contributions

Provide details on how to monitor the indicators identified in Section 2.1. (Tables can be added based on the number of selected SDGs.)

SDG Number	7
SDG Target	Affordable and clean energy
Variable or Indicator	Amount of generated electricity (Unit: MWh)
Duration/Frequency	Monthly
Method/Tool	Power meter
Responsible person	Staff of Siam Steel International Public Company Limited

SDG Number	17
SDG Target	Partnerships to achieve the goal
Variable or Indicator	Last annual progress report submission date
Duration/Frequency	Yearly
Method/Tool	-
Responsible person	Staff of Pacific Consultants Co., Ltd.

# Part 3 Do no net harm

# 3.1 'Do no net harm' Risk Assessment and Safeguards

Specify impacts and mitigation plans to mitigate negative impacts.

Potential Impact	Severity Level of Impact				Description of Impact	Action Plan to mitigate harmful impacts
of Project Activity	None	Low	Moderate	High		
1. Impacts on Environment and I	Natural Res	ources				
1.1 Physical resources						
Water pollution	1					
Soil pollution	1					
Air pollution	1					
Noise pollution	1					
Odor pollution	1					
Soil erosion, coastal/river erosion	1					
Vulnerability to natural disaster	1					
Other	✓					
1.2 Waste management						
Increase in solid waste/municipal	,					
solid waste	<b>/</b>					

Potential Impact	tential Impact Severity Level of Impact		Description of Impact	Action Plan to mitigate harmful impacts		
of Project Activity	None	Low	Moderate	High		
Increase in hazardous waste such as waste contaminated with oil, chemicals and used oil etc.	1					
Increase in infectious waste	✓					
Increase in electronic waste		<b>√</b>			After the installed solar PV modules reach the end of their useful life, which is expected to be several years after the project period ends, it will become necessary to dispose of them.	Since solar PV modules may contain hazardous substances, we plan to dispose of them appropriately in accordance with Thai regulations at the time of disposal.  If recycling facilities for solar PV modules are available at that time, we will prioritize recycling them as part of our business efforts.
Other	1					
1.3 Biological resources						
Impacts on forest areas and land- use change	1					
Loss of land and wildlife ecosystem	<b>√</b>					

Potential Impact	Potential Impact Severity Level of Impact Description of Impact		Action Plan to mitigate harmful impacts			
of Project Activity	None	Low	Moderate	High		
Loss of water resources and						
aquatic ecosystem	<b>✓</b>					
Foraging	1					
Food	1					
Other	1					
1.4 Human livelihood						
Water drainage or waterway	,					
diversion	✓					
Change in water consumption	1					
Change in land ownership	1					
Other	1					
2. Social impacts						
Public security such as increase in	,					
crime risks	✓					
Health impacts	1					
Relocation or						
temporary/permanent loss of land	<b>✓</b>					
Loss of housing	1					

Potential Impact	Severity Level of Impact				Description of Impact	Action Plan to mitigate harmful impacts
of Project Activity	None	Low	Moderate	High		
Impact on public utilities such as	1					
electricity, telephone service etc.						
Impact on traffic	1					
Community conflict	1					
Employment and labor	1					
Impact on people of certain race,						
religion and ethnic groups	✓					
Damage to areas of high						
conservation value, such as						
religious sites, historic sites,	1					
monuments, important places of						
the community etc.						
Impact on human rights such as						
education, freedom of thought,	1					
religion etc.						
Gender inequality such as in						
employment opportunities, salary,	✓					
promotion, benefits, termination						
of contract etc.						

Potential Impact	Severity Level of Impact				Description of Impact	Action Plan to mitigate harmful impacts
of Project Activity	None	Low	Moderate	High		
Other	✓					
3. Economic impacts						
Increase unemployment /loss of income of people in local communities	1					
Other	<b>√</b>					

#### \*Criteria for assessing the level of impact severity

- 1. None: The proposed activity has no direct/indirect impacts on the environment, society and economy.
- 2. Low: The proposed activity causes some changes to the existing conditions but has no implication on the quality of the environment, society and economy. The impact is short-lived and temporary, and the extent of the affected area is not large (1km perimeter).
- 3. Moderate: The proposed activity causes some changes to the existing conditions and has implications on values or qualities of the environment, society and economy. The impact is short-lived and temporary. The extent of the affected area is large but confined to the related area (2km perimeter).
- 4. High: The proposed activity causes some changes to the existing conditions and has implications on value or quality of the environment, society, economy, and potentially the ecosystem. The impact is permanent and the extent of the affected area id extensive (3km perimeter).

### 3.2 Details on Monitoring Parameters for Ensuring No Negative Impacts

Provide details on how to monitor the impacts identified in Section 3.1. (Tables can be added based on the number of negative impacts identified)

Category of negative impact	Waste management		
Subcategory of negative	Increase in electronic waste		
impact			
Vulnerable group	People and the environment around solar PV module		
	disposal sites		
Possible negative impact	Harmful substances leaking from improperly disposed solar		
	PV modules can pollute the surrounding environment and		
	pose health risks to nearby residents.		
Parameter/indicator	Number of PV modules properly disposed of		
Reference	- Hazardous Substance Act (No.4) B.E. 2562 (2019)		
	- Notification of Ministry of Industry Subject: List of		
	Hazardous Substances (No.7) B.E. 2565 (2022)		
<b>Duration/frequency</b>	Yearly		
Method/Tools	Apply the method in accordance with Thai regulations at		
	the time of disposal.		
Responsible person	Staff of Siam Steel International Public Company Limited		
<b>Expected outcome</b>	Solar PV modules containing hazardous materials are		
	disposed of properly, thereby protecting the environment		
	and people around the disposal site.		

Category of negative impact	
Subcategory of negative	
impact	
Vulnerable group	
Possible negative impact	
Parameter/indicator	
Reference	
<b>Duration/frequency</b>	
Method/Tools	
Responsible person	
<b>Expected outcome</b>
