Date: Jan. 1, 2015

LETTER OF CONSENT

We, Ebara Refrigeration Equipment & Systems Co., Ltd. (ERS) and PT. Ebara Indonesia (PTEI), hereby give our consent on plan for periodical checks after the installation of high-efficiency centrifugal chiller (the project chiller for JCM Model Project in PT. Nikawa Textile Industry which was installed in November 2014), which contributes to mitigate GHG emissions under the Joint Crediting Mechanism (JCM). We also consent to the followings:

- 1) In order to keep proper performance of the chiller, at least one direct periodical check per year by PTEI and remote periodical checks every month by the remote monitoring system by ERS will be conducted. This remote monitoring system automatically detects the potential error every hour and reports any abnormal condition of chiller to ERS immediately. Thus, this periodical check procedure both by direct and remote method is more frequent, effective and better than five times of periodical checks stipulated in the methodology (ID\_AM002).
- 2) Whenever we (ERS and PTEI) conduct periodical checks, the records of maintenance will be provided to PT. Nikawa Textile Industry.

Yours faithfully,

  
T. Okada  
Ebara Refrigeration Equipment & Systems Co., Ltd. (ERS)

  
M. Okada  
PT. Ebara Indonesia (PTEI)
