JCM Proposed Methodology Form

Cover sheet of the Proposed Methodology Form						
Form for submitting the proposed methodology						
Host Country						
Name of the methodology proponents						
submitting this form						
Sectoral scope(s) to which the Proposed						
Methodology applies						
Title of the proposed methodology, and						
version number						
List of documents to be attached to this			☐The attached draft JCM-PDD:			
form (please check):			Additional information			
Date of completion						
History of the proposed methodology						
Version	Date	Contents revised				

B. Terms and definitions Terms Definitions C. Summary of the methodology Litems Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions Emission sources GHG types							
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	A. Title of the methodology						
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types							
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types							
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types							
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	TD (T) 1.1 (* */*						
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	B. Terms and definitions						
C. Summary of the methodology Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	Т	Definitions					
Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	Terms	Definitions					
Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types							
Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types							
Items Summary GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	C. Summary of the method	nlagy					
GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	or summary or the method	, , , , , , , , , , , , , , , , , , ,					
GHG emission reduction measures Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	Items	Summary					
Calculation of reference emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types		,					
emissions Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types	measures						
Calculation of project emissions Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions	Calculation of reference						
Monitoring parameters D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions	emissions						
D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions	Calculation of project						
D. Eligibility criteria This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions	emissions						
This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions	Monitoring parameters						
This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions							
This methodology is applicable to projects that satisfy all of the following criteria. Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions							
Criterion 1 Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions							
Criterion 2 Criterion 3 E. Emission Sources and GHG types Reference emissions		ble to projects that satisfy all of the foll	owing criteria.				
Criterion 3 E. Emission Sources and GHG types Reference emissions							
E. Emission Sources and GHG types Reference emissions							
Reference emissions	Criterion 5						
Reference emissions							
Reference emissions							
	E. Emission Sources and GHG types						
		Pafarance amissions					
Emission sources Und types	Em	GHG types					
	EIII	OHO types					

Project emissions				
Emission sources	GHG types			
	31			
F. Establishment and calculation of reference emissions				
F.1. Establishment of reference emissions				
F.2. Calculation of reference emissions				
1.2. Calculation of felefence emissions				
G. Calculation of project emissions				
G. Calculation of project chinssions				
H. Calculation of emissions reductions				
- Calculation of Chrissions reductions				

The source of each data and parameter fixed *ex ante* is listed as below.

I. Data and parameters fixed ex ante

Parameter	Description of data	Source
